

**American Legion Post #233
Palm Valley, FL 32082**

April – May 2013 website report for the AL233FL.org website

April web activities resulted in more than 3,200 individual visitors. During the month of April the hosting company's server became compromised and the visitation data for the Legion website became corrupted and inaccessible. This data loss continued through the month of May and was finally corrected in the beginning of June.

During the months of April and May I logged a total of 85 hours of volunteer website time.
